### Photograph magnificent Golden Eagles from comfortable hides

We have fed wintering **Golden Eagles** at our feeding site for over a 15 years now and we are proud to say that this is the best place for Golden Eagles in action photography in Finland. Golden Eagles visit our feeding site very actively during winter, and in January there can be up to ten individuals daily. Our hides provide excellent opportunities for a great diversity of images of Eagles in flight, perching, and most importantly - Golden Eagles in action!

Finnature's new Golden Eagle hide is really comfortable with a great heating system, standing height and good office chairs. This luxurious hide is only available for the Finnature's photography groups and brings your hide experience to the new level!

The Golden Eagles visit our feeding site very actively in mid winter: in January there can be even up to 10 individuals daily! In February days are getting longer and there will be more light!

### Highlights

**Golden Eagles** in flight, on ground, perched on trees and fighting. Other possible species **Great-, Crested-, Willow and Blue Tits, Yellow Hammers, Bullfinches, Eurasian Jays, Gey-headed and Great Spotted Woodpeckers and Red Squirrels.**
